

As we strive to BRIGHTen the world around us, we realize that a multi-faceted approach is necessary to be optimally effective. As such, we will be implementing practical demonstrations of eco-friendly technologies, actively greening our surroundings, reducing the energy footprint of our school, and increasing community awareness of issues relating to the environment.

We will be starting off the year by participating in the Great Canadian Shoreline Cleanup and the Royal Botanical Gardens' Biodiversity Festival.

The items listed are a representation of our current objectives for the upcoming months, as decided, collaboratively by the BRIGHT EcoTeam at our last meeting. While some items may undergo minor revisions, we hope that as the year progresses, we will not only meet the objectives outlined, but will continue to implement new and innovative ideas that will allow us to surpass our previous accomplishments. With the dedication and support of BRIGHT, and together as a Bishop Ryan community, we know that this will be our best year yet!
