

Prayer for the Mothers of the Unborn

By Rishelle Fernandez, 2019

Even though You have blessed many women with wonderful gifts, some women sometimes do not appreciate all the gifts You have bestowed upon them, such as procreation.

We pray that You will get the thought of even killing an innocent child out of the minds of those who are thinking of hurting an unborn child.

Lord, always guide them lovingly to life giving decisions.

We hope that no child will be harmed, and that doctors and nurses will have the courage to assist in refusing abortions.

Help women in tough situations, for no one deserves to go through this painful experience.

Also, help young women to understand that their academics come first, and as they get older, they can build their own families.

We thank You for blessing these women, and please continue to bless them with their bundles of joy when they are ready to enter the world.

For the women who did have abortions, and have experienced the terrible side effects, please help them to heal.

Though they did do something that was not right, please forgive them Lord of Mercy.

Lord, hopefully their bodies have not been damaged to the point where it can lead to becoming ill. We pray that their bodies will still be healthy after what they have been through.

Lord, may the mother of the child be cared for.

Lord, may the little fetus soul be lifted.

Amen.
